February 12, 1952

Dr. J. S. K. Boyd Wellcome Laboratories of Tropical Medicine 183 Euston Road London NW 1, England.

Dear Dr. Boyd:

I would appreciate the favor of a reprint of your paper on the relationship between lytic and lysogenic phage in Salmonella that appeared in J.P.B. last year. I regret that by inadvertence, you name has escaped my mailing list; this will be corrected promptly. The enclosed will give some clues to the directions of our interest. Please note that in K-12, sensitive x sensitive crosses are fully fertile, contra various speculations.

If you can spage a second copy, Mr. Zinder would, like to have a repaint of the same paper.

Sincerely,

Joshua Lederberg
